### **About CrossStaff Publishing**

The cross staff was developed by Levi ben Gersohn around 1342. It was used by early explorers, and guided Columbus to the New World and the Pilgrims on the Mayflower to religious freedom. These early pioneers probably noticed an interesting aspect of this navigational tool—users looked through a cross to chart their course toward their destinations. CrossStaff Publishers believes that it is through the cross of Jesus Christ that life's answers are found. It is our "moral compass." Just as ancient mariners had little room for excess baggage, we believe that readers want books that touch their hearts and deal with life's core issues.
